

A P ABHIRAM KRISHNA

abhiramkrishna560@gmail.com | +91 9188 577 376 | LinkedIn: ABHIRAM KRISHNA

PROFILE

A passionate Computer Applications graduate equipped with a strong background in data science and analytics for solving real-world problems, who has an academic foundation in Programming, Data Analysis, and Machine Learning with practical experience in Python, SQL, and Java.

EDUCATION

Bachelor's Degree in Computer Applications (Spec. in Data Science) CGPA: 9.47 Amrita Vishwa Vidyapeetham, Amritapuri	August 2023 – August 2026 Kerala, IN
Higher Secondary - Computer/Maths CGPA: 8.80 Navajeevan Bethany Vidyalaya	July 2021 – May 2023 Kerala, IN
Secondary CGPA: 9.12 Navajeevan Bethany Vidyalaya	June 2020 – May 2021 Kerala, IN

PROJECTS

Automated Class Diagram Differencing using Vision Language Models (VLM) Developing an automated UML learning framework using Vision Language Models (VLMs) to analyze and compare image-based class diagrams, detect structural and semantic errors, and provide iterative feedback to improve modeling accuracy and learning outcomes.	February 2026 – June 2026
Explainable Feedback and Iterative Correction Framework for Specification-to-UML Diagram Generation in Software Engineering Education Built an explainable UML validation framework using Python, LLMs, and PlantUML, enabling iterative feedback to improve modeling accuracy in software engineering education	August 2025 – December 2025
Semantic Relation Extraction for Use Case Modeling: A PlantUML-based Automation Framework An NLP-based system using Python spaCy to automatically generate use case diagrams from software specifications, designed as a learning aid for students. Published at the IEEE INDISCON '25 Conference held at IIT Rourkela.	March 2025 – July 2025

SKILLS

Data Mining and Machine Learning

Experienced in Data Preprocessing, Cleaning, and Transformation; skilled in Frequent Pattern Mining, Classification, and Clustering techniques; familiar with applying Machine Learning algorithms to extract insights and support decision-making.

Data Analysis and Visualization

Skilled in analyzing datasets and presenting insights through visualizations using Python libraries such as Pandas, NumPy, Matplotlib, and Seaborn.

DSA and OOPs

Proficient in Object-Oriented Programming principles and implementation of data structures and algorithms in Python and Java, focusing on problem-solving, efficiency, and code reusability.

Database Management

Experienced in SQL and PL/SQL for database design, querying, and optimization, with hands-on practice using MySQL and PostgreSQL.

SOFT SKILLS

Team Collaboration & Management

Strong teamwork and collaboration skills, with experience in leadership and coordination gained through playing and managing team-based sports like basketball.

Decision Making

Strengthened through coordinating events and making quick, strategic choices during games.

Adaptability

Built by balancing roles as a player, organizer and a student throughout the academic years.

ACHIEVEMENTS

Certificate Of Presentation

Presented at the **6th IEEE India Council International Subsections Conference** organized by IEEE Rourkela Subsection and IEEE India Council held at NIT Rourkela

Campus Gold Rank

Achieved Campus Gold on my BCA Data Science degree at Amrita Vishwa Vidyapeetham, Amritapuri

Basketball Runner-Up

The Runner-Up in the Basketball Tournaments: South Zone Sahodaya 2022 and Inter-Amrita 2024

AREAS OF INTEREST

Analytics and Visualization

Applying statistical and computational methods to extract and present insights through impactful visual representations.

Large Language Models

Interested in leveraging advanced AI models for text generation, reasoning, and automation tasks.

Natural Language Processing

Exploring techniques for processing and understanding human language through computational methods.

ORGANISATIONS

Amrita Vishwa Vidyapeetham, Amritapuri Sports Council

Organizer

Has been appointed as the sports organizer from 2024 to 2026

CERTIFICATE COURSES

Introduction To Large Language Models (LinkedIn Learning)

January 18, 2025

Learned LLM architectures, scaling laws, tokenization, efficiency methods, and open vs. proprietary model trade-offs

Excel Regression Analysis (Great Learning)

November 27, 2024

Performed regression analysis in Excel, including data cleaning, model building,output interpretation, and predictive modeling.

Machine Learning (Udemy)

July 23, 2025

Learned to build ML models in Python with Scikit-Learn, apply regression, classification, clustering, and choose suitable models.
